

ASX ANNOUNCEMENT AND PRESS RELEASE

3 September 2007

Minemakers is pleased to announce the appointment of Mr Russell Fulton to the position of Geological Manager.

Based in Tasmania, Mr Fulton has supervised the first stage drilling programmes at both the Aberfoyle and Storey's Creek tungsten-tin projects at Rossarden. Drilling is due to recommence there next week. He will initially concentrate upon these projects, the Lutwyche tungsten-tin deposit, and Minemakers' other wholly owned tin deposits at Anchor, Royal George and Great Pyramid.

Mr Fulton will also initiate a geological re-appraisal of the Moina fluorite and polymetallic project.

Minemakers' Managing Director, Andrew Drummond said, *"At this time of intense competition to attain superior personnel, the Company is very pleased that Russell has been attracted to us by the quality and breadth of our projects. We look forward to his input enhancing the potential for earlier production."*

Andrew Drummond
